PD705/PD705G Versatile Digital Portable Two-Way Radio

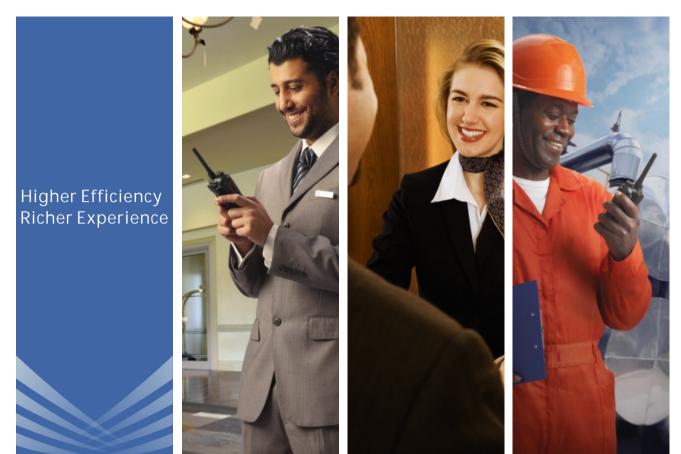

As a product built to the DMR standard, PD705/705G (PD705G is the model with GPS) is endowed with ergonomic design, allround digital functions and remarkable guality to refresh your experience and enable you to be responsive to emergent situations.

- Superior Digital Voice
- Submersible with IP57 Rating

Hvtera

Product Features

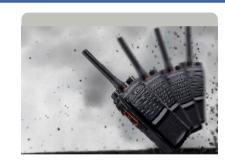

Ergonomic Design The globally patented industrial design and antenna design ensure convenient operation and remarkable GPS performance.

Reliable Quality

PD705/705G is strictly compliant with MIL-STD-810 C/D/E/F and IP57 standards, ensuring outstanding performance even under harsh environments.

Superior Voice

With the combined application of narrowband codec and digital errorcorrection technologies, PD705/705G is capable of ensuring you superior voice under noisy environments or at the edge of the coverage area. In addition, the adoption of the AGC technology also optimizes your voice. With a built-in 1W speaker, PD705/705G ensures clear and crisp voice communication.

Durable Battery Compared with an analog radio,

PD705/705G can obtain an extra 40% operation time.

Higher SpectruEfficiency, Higher Channel Capacity

Benefiting from the TDMA technology, PD705/705G allows twice the channels based on the same spectrum resource. This is a big help to relieve the stress of increasing shortage in spectrum resource.

Dual-slot Pseudo Trunking

With this feature, the free slot can be allocated to a member that needs to communicate, effectively enhancing frequency efficiency and allowing you to communicate timely under emergent situations.

Secure Communication (Optional)

Besides the intrinsic encryption of the digital technology, PD705/705G provides enhanced encryption capability (such as 256-bit encryption algorithm) and the Scrambler feature (selectable).

Versatile Services

In addition to conventional communication services, PD705/705G features rich data services and selectable functions such as Scan, Emergency, Man Down (optional), High-speed Data Transmission* and Lone Worker*.

Further Development Port

The reserved port in PD705/705G allows users or anythird party to further develop other helpful functions (GPS, Call Control and Telemetry).

* indicates functions available in later version

Main Functions >>

- Dual Modes (Analog+Digital) PD705/705G can operate in either analog or digital mode. It is compatible with the prevalent analog system, ensuring a smooth analog-to-digital transition.
- Versatile Voice Calls
- Intelligent signaling of PD705/705G supports various voicecall types, including Private Call, Group Call and All Call.
- Vibrate This feature ishelpful in alerting youto reception of any voice undernoisy or low-volumeconditions.
- IP Service* PD705/705G allows multipleIP functions if connected with a PC via IP address.
- Various Analog Signaling Types PD705/705G supports various analog signaling types (HDC1200, DTMF*, 2-Tone* and 5-Tone*), providing higher function expansion capacity.
- Software Upgradable With this capability, you can enjoy further features without buying a new machine.
